

What is it?

Nemsys will be deploying Total Email Security email spam solution which will replace the current spam filter. You will no longer use the three mailboxes under Spam (Allowed Senders, Blocked Senders, and Quarantine) in your email. These will be removed shortly after Total Email Security is installed.

What to expect

You will get an email at 4:00 PM listing your current spam emails from Nemsys, if there are any. This listing contains the previous days spam from 4PM on to today at 4PM. You have options on the right side to *View, Release the Message, Allow from sender*.

Nemsys Messages quarantined since April 8, 2015 4:00 PM for jkeister@areaofficeonaging.c... Thu 4/9/2015 4:08 PM 47 KB

We have quarantined **one message** since **April 21, 2015 4:00 PM** for kkeefe@nemsys.com.

We have included some of the messages below for your review. **We omitted 0 blatant spam messages** from this email. You can change your threshold in the "Quarantine Settings" section of your User Properties page.

[Enter Your Quarantine](#)

Subject	Address	Time	Actions
Live demo - Improving productivity: Dropbox for Business Emma King	< eking@dropbox.com > via 077-zt-858.0.5857.0.0.12901.7.6233	3:31 AM	-View -Release Message -Allow From Sender
Subject	Address	Time	Actions

Under Actions you can View the message then decide to release it. If you want to Release the Message an internet window will pop up briefly then the email should appear in your inbox. You can also choose to Allow the message from Sender. This will allow all messages from that sender

Further Details
